

Transdisciplinary Approach

Utilizing a transdisciplinary approach has been a core feature of L.I.F.E. since its very beginning!

This means at L.I.F.E. team members work with consumers on discipline specific goals but are able to work extremely collaboratively with other disciplines to support reinforcement/practice of these skills in different environments and contexts.

Through this regular collaboration, consumers achieve better overall progress!

Extensive Collaboration at L.I.F.E. Through:

- All services in one place
- All services under one management system
- Common L.I.F.E. Language and disability model
- Co-treatment sessions
- Natural collaboration in mixed discipline therapy treatment rooms
- Therapy sessions and training in the classroom to help teachers and staff
- Training across departments from Behavior Support and Programming department
- Regular team meetings (consumer specific)
- Regular classroom consultation meetings (support team for teachers)
- Resource and Enhancement Team
 - Board Certified Behavioral Analyst (BCBA)
 - Augmentative Alternative Communication (AAC) Support
 - Assistive Technology Services
 - Music Therapist
 - Certified Therapeutic Recreation Specialist (CTRS)
